

Information on Phase 2 of Course Projects

Time: December 2nd, 2:30pm to 9:30 pm (with 30 minutes break between 5:30pm and 6:00pm)

Format: Online (through Teams Meeting, link will be sent out to all members and posted on Brightspace)

The presentation should be presented by all team members. It needs to be constraint within 10 minutes for a presentation, followed by a 5-minute Q&A session.

The presentation should tell the whole story of your project, which includes problem definitions, proposed methodologies and justification, performance evaluation (should include both visual and statistical results along with benchmark algorithms for comparison), and conclusions.

Grading Rubrics:

Criterion	Points	Description
Problem Definition	2 points	Clearly defines a specific problem in the field of electrical and computer engineering and explains its real-world impacts and challenges.
Methodology and Justification	2 points	Clearly explains the ML models and provides strong justification for why the chosen model is a suitable fit.
Performance Evaluation	4 points	Clearly demonstrate results in both statistical manner and visually. Provide meaning analysis and insights into the results. The results shown of the proposed models are better than benchmark algorithms.
Conclusion and presentation quality	2 points	Provides a strong conclusion summarizing key findings, limitations, and future work. Slides are clear and easy to read. The presentation adheres to the time limit.

Note: if you cannot attend the online meeting between 6:00pm and 9:30pm on December 2nd, you should let Prof. Nan Chen (nchen@uottawa.ca) know immediately. The order of presentations will be determined and posted on **November 25th**. There will be **NO CHANGE** to the presentation order after November 25th.

For student groups that cannot attend on December 2nd, between 6:00pm and 9:30 pm, you will be scheduled for the weekend of November 29th and 30th, potentially nighttime. Please

note that the rescheduled time is NOT NEGOTIABLE and you have to attend and present at the assigned time slots.
